Target version:			
Resolution:	Fixed		

Description

I would be nice to have a project tree with system and subsystems or packages and modules. This makes handling tickets a lot easier with many ticktes.

#2 - 2010-08-05 22:48 - Felix Schäfer

- Status changed from New to Closed

- Resolution set to Fixed

I think this was primarily a request to have nested plugins, which I think wasn't possible one year ago (it started in 0.9.0 IIRC).

Closing as I consider this fixed, please reopen a UI feature request if this was for a better issue list view.
