

Redmine - Feature #3037

Ability to filter updates in issue history

2009-03-24 01:01 - Paul Quirk

Status: Closed	Start date: 2009-03-24
Priority: Normal	Due date:

Target version:	
Resolution: Duplicate	
Description	
<p>Often where we have multiple user types accessing our system, e.g. programmers, testers, business users, we'd like to <i>hide</i> certain items in their view of issue history. Typically this applies to Business Users who don't want to see programmer's updates. A way to flag an update with some type of category or similar, then allow filtering based on role would be good.</p>
