Target version:	Affected version:
Resolution: Fixed	

Description

test_autologin is failing every now and then on my build server. Most of the time it's during language updates so I'm suspecting something wrong with the test, maybe a Time issue?

```
"Build 899aee4011cb992ea2156238c1bdd34877f5dab6 failed"

Test failure (#3041).

History

I never get a failure on this assertion. I don't really see what's wrong.
Please, let me know if it still fails after [r2640](#).

Haven't seen it fail yet so I'm closing this issue. It would be nice to mock out Time in the tests so they aren't time dependent.
