Category: Database	Estimated time: 0.00 hour
Target version: Candidate for next major release	
Resolution:	
Description	
Support for MySQL 5.5 ended in December 2018:	
Resources:	
- https://en.wikipedia.org/wiki/MySQL#Milestones	
- https://www.fromdual.com/support-for-mysql-from-oracle	
There are no changes in the code from what I've found, I think that we should just update the wiki and add this ticket to the Changelog.	
I propose to drop support in version:"4.1.0".	

History

I think it is premature to drop support for MySQL 5.5.

- CentOS 7 bundles MariaDB 5.5.60. The support for CentOS ends on 2024-06-30
- The latest version of ActiveRecord 6.0.0 still supports MySQL 5.5.8:

https://github.com/rails/rails/blob/6-0-stable/activerecord/lib/active_record/connection_adapters/abstract_mysql_adapter.rb#L520
