

Redmine - Defect #30428

API upload documentation is wrong

2019-01-14 20:51 - Brennen Sprimont

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:		Affected version:	3.2.1
Resolution:	Fixed		
Description			
<p>All documentation on the "uploads" api endpoint appears to be outdated. It doesn't mention anything about a "filename" parameter anywhere and it's not in any examples. However, if the "filename" parameter is excluded, the request always fails with a 422 "extension is not allowed". It looks like this change was made 6 years ago: https://www.redmine.org/projects/redmine/repository/revisions/10678.</p> <p>Please add mention of the "filename" parameter, how it is now required, and examples using it.</p> <p>For example, on: http://www.redmine.org/projects/redmine/wiki/Rest_api_with_curl#Attaching-files</p> <p>The new curl example should be: curl --data-binary "@image.png" -H "Content-Type: application/octet-stream" -X POST -u login:password http://redmine/uploads.xml?filename='image.png'</p> <p>Thanks</p>

#2 - 2019-02-02 08:04 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed

Thank you for pointing it out. You will see "Attachment extension is not allowed" error if you use "Allowed extensions" / "Disallowed extensions" feature.

I have updated two pages.
