Description

Hello,
I´ve done new instalation of ubuntu (16.04)
Clear instalation.
I used this tutorial for redmine,apache and mysql instalation
http://www.redmine.org/projects/redmine/wiki/howto_install_redmine_on_ubuntu_step_by_step

But when I restar apache and open 127.0.0.1/redmine I see just list of directory content. I went step by step from tutorial. What is wrong.

I´ve found similar issue but it is not my case.

Could you help me please?
Thank you
Have a nice day
