Redmine - Feature #30480

Is there any option in custom fields to make them read only in the form

Description

I have some custom fields in issue creation form which are having pre-filled data and I don't want anyone to change them.

Actually it should show like a disabled input field with default value. My intention is to inform the user , this is the value of this field but don't want to allow them to edit that value. Is there any option for that in any version of redmine ?

Please help me
