Maybe it is enough to return 404 when the request format is HTML?

- Target version set to Candidate for next minor release

#5 - 2019-02-04 03:30 - Go MAEDA

Since I use MacBook Pro and don't have a mouse with a middle button, I cannot reproduce the problem. Adding issue watchers works fine for me.

Could someone tell me how the middle button works and causes the error?

#6 - 2019-02-04 06:28 - Marius BĂLTEANU

Yes, middle button means Open link in new tab. To reproduce, go to an issue, right click on the Add watchers link and then Open link in a new tab. Technically, instead of an Ajax request you will do a simple get request.

Yes, middle button means Open link in new tab.

Thanks, I understand. I think this issue is not a big problem, so the fix that simply returns 404 is enough.

I found that this issue also affects the following links.

- "Watch" link
- "Search for watchers to add" link on "New issue" page

#8 - 2023-12-21 07:45 - Marius BĂLTEANU

- *Is duplicate of Patch #39894: Explicitly render a 404 on non-JS requests to watchers#new added*

#9 - 2023-12-21 08:01 - Marius BĂLTEANU
