

Redmine - Defect #30728

Issues Note id changes when changing order in account preferences

2019-01-31 15:15 - Marvin Wener

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	3.4.6
Resolution:			
Description			
<p>In "my account" I can choose to reverse the order in which the notes are projected. When I link to a note using <code>#<ticket_id>-1</code> (linking the first note) then change the order, my link still points to Note-1 rather than note-X.</p> <p>Since different users may use different account settings, confusion can arise when wrong notes are linked.</p> <p>I did a dirty fix in <code>_history.html.erb</code> for now:</p> <pre><% reply_links = issue.notes_addable? -%> <% for journal in journals %> <% if User.current.wants_comments_in_reverse_order? %> <% fix_index = journals.count - journal.indice %> <% else %> <% fix_index = journal.indice %> <% end %> <div id="change-<%= journal.id %>" class="<%= journal.css_classes %>"> <div id="note-<%= fix_index %>"> <h4><a href="#note-<%= fix_index %>" class="journal-link">#<%= fix_index %> <%= avatar(journal.user, :size => "24") %> <%= authoring journal.created_on, journal.user, :label => :label_updated_time_by %> <%= render_private_notes_indicator(journal) %></h4> <% if journal.details.any? %> <ul class="details"> <% details_to_strings(journal.visible_details).each do string %> <%= string %> <% end %> <% if Setting.thumbnails_enabled? && (thumbnail_attachments = journal_thumbnail_attachments(journal)).any? %> <div class="thumbnails"> <% thumbnail_attachments.each do attachment %> <div><%= thumbnail_tag(attachment) %></div> <% end %> </div> <% end %> <% end %> <%= render_notes(issue, journal, :reply_links => reply_links) unless journal.notes.blank? %> </div></pre>			

```
</div>
<%= call_hook(:view_issues_history_journal_bottom, { :journal => journal }) %>
<% end %>

<% heads_for_wiki_formatter if User.current.allowed_to?(:edit_issue_notes, issue.project) ||
User.current.allowed_to?(:edit_own_issue_notes, issue.project) %>
```
