

Redmine - Feature #30733

Keep submitted form data when updating an issue with an expired authentication token

2019-02-03 22:07 - Stuart Whelan

| Resolution: | |
| Description When a user submits an update to a issue and their authentication token has expired redmine will return a simple '422, invalid authenticity token.' message on a blank screen. All the data the user has entered is lost. It would be good if Redmine had a way to prompt the user for re-authentication without losing their entered data. | |
