Description

Currently, Gravatar icons are shown in Web UI when Setting.gravatar_enabled? is true but not shown at all in email notifications.

Icons are really useful to quickly understand the author, assignee, and the user who updated the issue. I think it would be a nice improvement of UX if Gravatar icons are shown in emails as well.

Thanks. Do you think it is possible to move the style for the icon from app/helpers/application_helper.rb to app/views/layouts/mailer.html.erb, instead of using inline styles?
