

Redmine - Feature #30826

Order of related issues types

2019-02-18 09:14 - Bolesław Kalinowski

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:			
Resolution:			

Description

I'am expected that value of *order* in *TYPES* (issue_relations.rb) determines the order on display.
The order of displaying types of relations (*precedes*, *follows*) depend on order of adding relations.

History

#1 - 2019-05-27 15:23 - Bolesław Kalinowski

Environment:
Redmine version 3.4.6.stable
Ruby version 2.4.1-p111 (2017-03-22) [x86_64-linux]
Rails version 4.2.10
Environment production
Database adapter Mysql2

When i'm create in issue A relation *precedes* to issue B.
Then create in issue B relation *precedes* to issue C.
Then create in issue B relation *follows* to issue D.
Now on the screen i'm see:

follows B
precedes C
follows D
