

Redmine - Feature #30829

Simpler link syntax "#note-123" to make a link to a note of the current issue

2019-02-18 10:57 - Go MAEDA

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Text formatting	Estimated time:	0.00 hour
Target version:	4.1.0		
Resolution:	Fixed		
Description			
<p>Currently, you can link to issue notes using the syntax #98765#note-123. I propose a new syntax #note-123 to link to a note of the current issue.</p> <p>Sometimes I feel that the markup used to link to a note of the current issue is too lengthy. Suppose that you are editing issue #98765 and you want to link to note-123. You can link to the note with the markup #98765#note-123. But I think #note-123 is enough when the link destination is in the current issue. Copy and paste the current issue is waste of time.</p> <p>We can save time a bit if Redmine supports a new link syntax #note-123 that allows omitting issue number when linking to a note of the current issue.</p>			

Associated revisions

Revision 17993 - 2019-03-20 06:15 - Go MAEDA

Simpler link syntax "#note-123" to make a link to a note of the current issue (#30829).

Contributed by Marius BALTEANU and Yuichi HARADA.

Revision 18002 - 2019-03-23 06:57 - Go MAEDA

Add a link syntax "#note-6" to help files (#30829).

Contributed by Hinako Tajima.

Since #16313, you can already use `[[#note-123]]` to link to an arbitrary ID on the current page, regardless of whether this is an issue note, a wiki header, or any other id.

Maybe this is already sufficient?

Oh, I didn't know that! Thank you.

But my team already has a working patch. The patch will be posted soon.

I think `#note-123` is even more intuitive than `[[#note-123]]` because it is more consistent with the syntax `#98765#note-123`. And `[[#note-123]]` looks like a link to a Wiki page.

The link to a note of current issue is very easy to write.

I attached a patch.

#7 - 2019-03-04 12:41 - Go MAEDA

- Target version set to Candidate for next major release

#8 - 2019-03-06 04:53 - Go MAEDA

- Target version changed from Candidate for next major release to 4.1.0

LGTM. Setting the target version to 4.1.0.

#9 - 2019-03-10 10:08 - Marius BALTEANU

The patch as it is cannot be committed because we should link only to anchor and not to the entire url in order to preserve existing parameters (eg: `issue_count`, `issue_position`, etc) and to prevent issue/page reloading.

#10 - 2019-03-10 10:22 - Marius BALTEANU

Maybe the below changes are enough to implement this feature:

```
diff --git a/app/helpers/application_helper.rb b/app/helpers/application_helper.rb
