### History

**#1 - 2019-02-23 16:33 - Anonymous**

I think it would actually be the best to set current year in the footer of Redmine with JS like `<script> document.write((new Date()).getFullYear())); </script>`

So it wouldn't bother developers to update the year on each release, IMHO it's always a -1 minor unnecessary task when done automatically.

These days to have system time set correctly is a requirement anyway, or else nothing will work properly.

**#2 - 2019-02-24 00:56 - Go MAEDA**

- Target version set to 3.4.10

**#3 - 2019-03-15 08:38 - Jean-Philippe Lang**

- Category set to UI
- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Resolution set to Fixed

Updated to 2019.
