

Redmine - Defect #3089

Text formatting sometimes breaks when combined

2009-04-01 06:31 - Anonymous

Status:	Closed	Start date:	2009-04-01
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	UI	Estimated time:	0.00 hour
Target version:	1.0.0 (RC)	Affected version:	0.8.2
Resolution:	Fixed		
Description When you combine some text formatting it doesn't always work: <i>this should be bold inside italic</i> <u>this should be bold inside underline</u> this should be bold inside deleted *this should be bold inside inline code* <i>this should be italic inside bold</i> (works) <u><i>this should be italic inside underline</i></u> <i>this should be italic inside deleted</i> (works) _this should be italic inside inline code_ <u>this should be underlined inside bold</u> (works) <u><i>this should be underlined inside italics</i></u> (works) this should be underlined inside deleted (works) -this should be underline inside inline code- this should be deleted inside bold <i>this should be deleted inside italic</i> <u>this should be deleted inside underline</u> -this should be deleted inside inline code- this should be inline code inside bold (works) @this should be inline code inside italic@ <u>this should be inline code inside underline</u> (works) this should be inline code inside deleted (works) I don't think anything needs to be changed for "inline code" because of its purpose, but it would be nice if the others could be freely combined.
