Target version:	Candidate for next major release		
Resolution:			

Description

Currently ([r17844](#) and later), you can see the issue tracking table on the profile page. You can see the number of assigned and reported issues in the table and you can quickly access the corresponding issues list of each value.

I propose to add a new row "Updated issues" to the table. The row shows the number of issues the user updated (in other words, the number of issues the user involved). And each value is linked to issues list filtered by "Updated by" filter introduced in Redmine 3.4 ([#17720](#)).

The feature will provide quick shortcuts to "Updated by" filter and useful to see the issues which the user involved.

I attached a patch.

The "Updated issues" row shows number of open, closed and total. And each value is linked to issues list filtered by "Updated by" filter.

#3 - 2019-03-07 22:50 - Marius BĂLTEANU

I'm not sure that retrieving the "Updated issues" using a custom query is the best option. I would investigate how to get those issues using IssueQuery (in the same way how the issues are retrieved in My page) if we really want to add this feature.

Beside this, we really need to know the exact number of those issues (especially the closed ones)?
