Target version:	4.1.0			
Resolution:	Fixed			

Description

As Jan wrote in [#9226](#), beginners often get confused after creating a new issue status that they cannot find the newly added status in the Status drop-down. This is because they haven't learned that they should associate statuses to trackers by configuring workflows.

I think it is helpful for them if Redmine shows a proper warning when no tracker uses the status in its workflows. The warning will give them a good hint about the fact that they should configure workflows to uses the issue status.

Issue statuses		New status
Status	**Issue closed**
