

Redmine - Feature #30981

Allow "New Member" modal to keep track of selected users between searches

2019-03-06 11:03 - Stephane Evr

| Description | | | |
| When we add new members to a project through the "New Member" modal, there is a search box and, if there are lots of users, pagination. | | | |
| - If we attempt to search for a user, check it, then search for another one, the initial selection is lost. | | | |
| - If we use pagination at least twice, the same effect occurs (the users selected on one page are lost). | | | |
| This feature could be a good addition to redmine instances with lots of users | | | |
