Redmine - Defect #30988
Preformatted text overflows the preview area
2019-03-07 09:42 - Mizuki ISHIKAWA

| Status: | Closed |
| Priority: | Normal |
| Assignee: | Jean-Philippe Lang |
| Category: | UI |
| Target version: | 4.0.3 |
| Resolution: | Fixed |

**Description**

Like the image below, the pre tag overflows from the preview tab.

**Associated revisions**

Revision 18014 - 2019-03-30 07:16 - Jean-Philippe Lang

Preformatted text overflows the preview area (#30988).

Patch by Marius BALTEANU.

Revision 18018 - 2019-03-30 08:15 - Jean-Philippe Lang

Merged r18014 to 4.0-stable (#30988).

**History**

#1 - 2019-03-14 03:50 - Mizuki ISHIKAWA

The following changes solves this problem.

```diff
diff --git a/app/views/issues/_edit.html.erb b/app/views/issues/_edit.html.erb

- Target version set to Candidate for next minor release

#3 - 2019-03-15 03:30 - Go MAEDA
- Assignee set to Marius BALTEANU

Marius, could you review this fix?

#4 - 2019-03-15 09:53 - Marius BALTEANU

Looking right now, maybe we can include the fix for this issue in the next release (version:"4.0.3").

#5 - 2019-03-15 10:00 - Go MAEDA
- Subject changed from The pre tag with a long sentence overflows from the preview tab. to Preformatted text overflows the preview area
- Assignee deleted (Marius BALTEANU)
- Target version changed from Candidate for next minor release to 4.0.3

Thanks. Setting the target version to 4.0.3.

#6 - 2019-03-15 10:09 - Marius BALTEANU
The proposed patch is not enough, it only fixes the issue in the notes block.

The description is also affected, please the below screenshot:

description.png

The old fix before Edit/Preview tabs was the rule 'min-width': inherit; from below:

```css
fieldset.preview {
  margin-top: 1em;
  min-width: inherit;
  background: url(../images/draft.png);
}
```

My proposal is to backport the fix to all fieldset elements:

```bash
vagrant@jessie:/vagrant/project/redmine$ git diff
diff --git a/public/stylesheets/application.css b/public/stylesheets/application.css
index 7dde120..15b32df 100644
--- a/public/stylesheets/application.css
+++ b/public/stylesheets/application.css

```

I've tested in various pages in Chrome and I didn't see any issue, but any feedback is welcome.
