## Description

Copied from #31026.

[https://weblog.rubyonrails.org/2019/3/13/Rails-4-2-5-1-5-1-6-2-have-been-released/](https://weblog.rubyonrails.org/2019/3/13/Rails-4-2-5-1-5-1-6-2-have-been-released/)

Rails 4.2.11.1, 5.0.7.2, 5.1.6.2, 5.2.2.1, and 6.0.0.beta3 have been released! These contain the following important security fixes.

It is recommended that users upgrade as soon as possible:

Current Rails versions:

- 4.0.2 (2019-02-21) is using Rails 5.2.2 ([https://svn.redmine.org/redmine/tags/4.0.2/Gemfile](https://svn.redmine.org/redmine/tags/4.0.2/Gemfile))
- 3.4.9 (2019-02-21) is using Rails 4.2.11 ([https://svn.redmine.org/redmine/tags/3.4.9/Gemfile](https://svn.redmine.org/redmine/tags/3.4.9/Gemfile))

It might be helpful to allow patch version upgrades ("~>") so in cases like this users of Redmine could `bundle update rails` to get the latest versions before an official update of Redmine is available.
