Redmine - Patch #31088
Remove useless code in TimeEntryQuery#sql_for_activity_id_field
2019-03-24 08:58 - Go MAEDA

Status: Closed
Priority: Normal
Assignee: Go MAEDA
Category: Code cleanup/refactoring
Target version: 4.1.0

Description

I think we can safely remove the following two lines of code in TimeEntryQuery#sql_for_activity_id_field because the variable condition_on_id and condition_on_parent_id are never been used.

def sql_for_activity_id_field(field, operator, value)
  - condition_on_id = sql_for_field(field, operator, value, Enumeration.table_name, 'id')
  - condition_on_parent_id = sql_for_field(field, operator, value, Enumeration.table_name, 'parent_id')
    ids = value.map(&:to_i).join(',
    table_name = Enumeration.table_name
    if operator == '='
      "(#{table_name}.id IN (#{ids}) OR #{table_name}.parent_id IN (#{ids}))"
    else
      "(#{table_name}.id NOT IN (#{ids}) AND #{table_name}.parent_id IS NULL OR #{table_name}.parent_id NOT IN (#{ids}))"
    end
  end
end

Revision 18034 - 2019-04-03 06:00 - Go MAEDA

Remove useless code in TimeEntryQuery#sql_for_activity_id_field (#31088).

Patch by Go MAEDA.
