

Redmine - Defect #31118

Uninstalling a Plugin that hast assets

2019-03-29 14:16 - Jim McAleer

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Rails support	Estimated time:	0.00 hour
Target version:		Affected version:	3.4.6
Resolution:			
Description			
When uninstalling a plugin the proper way ...			
rake redmine:plugins:migrate NAME=plugin_name VERSION=0 RAILS_ENV=production			
Rails leaves the plugin's assets in the /public/plugin_assets/plugin_name folder is there a clean way to remove that folder without have to go and remove it manually?			
The problem is this can fill up the logs if it's not removed!
