

Redmine - Defect #31140

"English" becomes unavailable from Redmine 4.0.3

2019-04-04 08:13 - Ko Nagase

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:		Affected version:	4.0.3
Resolution:	Invalid		
Description After upgrading Redmine 4.0.2 => 4.0.3, [My account] - [Language] setting's "English" option becomes unavailable. [Redmine 4.0.2]  [Redmine 4.0.3] 			

History

#1 - 2019-04-04 08:17 - Go MAEDA

- Status changed from New to Needs feedback
- Private changed from No to Yes

I cannot reproduce the problem.

Running 'bin/rails tmp:clear' under the installation directory of Redmine may fix it.

#2 - 2019-04-04 08:17 - Go MAEDA

- Private changed from Yes to No

#3 - 2019-04-04 08:22 - Toshi MARUYAMA

- File en.png added

I cannot reproduce too.

#4 - 2019-04-04 08:26 - Ko Nagase

Thanks for quick advice!
I confirmed that running "bin/rails tmp:clear" solved the issue.

#5 - 2019-04-04 08:30 - Go MAEDA

- *Status changed from Needs feedback to Closed*
- *Resolution set to Invalid*

Thank you for the feedback.

#6 - 2019-04-07 05:00 - Ko Nagase

From further checking, I found that the issue cause was the followings.

1. I created "ja.yml" file on 1 plugin with invalid "en:" key on Redmine 4.0.3 environment.
(I forgot to replace the key to "ja:" after copying the file from "en.yml".)

```
redmine
+- plugins
+- redmine_xxx
+- config
```

```
+-- locales
+-- en.yml
+-- ja.yml (invalid "en:" key)
+-- :
```

2. Before checking Redmine itself, I removed all plugins, but I didn't execute "bin/rails tmp:clear".

I am so sorry for bothering you by my mistake.
