*- Subject changed from SCM: error when *.yml shows to SCM: error when *.yml and *.txt show*

*.txt also causes error.

The problem is caused by r17962(#30850).

By changing to format: false, in the case of request like "/test-trunk/projects/redmine-bb-all/repository/15/entry/test/fixtures/files/japanese-utf-8.txt", the end ".txt" is interpreted as the format.
I think that the exception was caused by not being found even if you look for the view file like entry.text.

exception message:

```
ActionView::MissingTemplate: Missing template repositories/entry, application/entry with {:locale=>[:en],
:formats=>[:text], :variants=>[], :handlers=>[:raw, :erb, :html, :builder, :ruby, :rsb]}
```
