<b>Target version:</b>		<b>Affected version:</b>	4.0.2
<b>Resolution:</b>	Invalid		

#### Description

Because Rails version 5.2 upgrade, method "alias\_method\_chain" don't work.  
Would to expert help me to Replace method "alias\_method\_chain" in Redmine 4.0.2, rails 5.2.

```
require_dependency 'account_controller'

module AccountLockable
  module AccountControllerPatch
    # unloadable

    extend ActiveSupport::Concern

    included do
      # unloadable

      #alias_method_chain :invalid_credentials, :account_lock
    end

    def invalid_credentials_with_account_lock
      invalid_credentials_without_account_lock
      return if params[:username].blank?

      user = User.active.find_by_login(params[:username])
      return if user.blank?

      login_log = LoginLog.find_or_create_by(user_id: user.id)
      login_log.failed!(request.remote_ip)

      if login_log.lockable?
        user.lock!
        login_log.locked!

        AccountLockableMailer.account_locked(user, login_log).deliver
      end
    end
  end
end

AccountLockable::AccountControllerPatch.tap do |mod|
  AccountController.send :include, mod unless AccountController.include?(mod)
end
```

#### History

##### #1 - 2019-04-08 09:28 - Go MAEDA

- Description updated
- Category deleted (Accounts / authentication)
- Status changed from New to Closed
- Resolution set to Invalid
