Redmine - Feature #31212

Add the possibility of having a field that tracks a change of status of related issues associated with a task

Description

I would like to suggest a new feature.
When a task is in verification block state due to unsolved related issues, it would be a very good improvement to have a Column that checks when the related issues are updated (date or state).
This way, it would be possible to track/sort, in table view, the blocked tasks by related issues update date or state. State would be a better option, but that is also nice.
