

## Redmine - Feature #31215

### Macro child\_pages should support reverse order

2019-04-17 10:32 - Miodrag Milic

<b>Status:</b> New	<b>Start date:</b>
<b>Priority:</b> Normal	<b>Due date:</b>
<b>Assignee:</b>	<b>% Done:</b> 0%
<b>Category:</b> Text formatting	<b>Estimated time:</b> 0.00 hour
<b>Target version:</b>	
<b>Resolution:</b>	
<b>Description</b> This is more appropriate for some contexts, for example monthly reports which you want sorted chronologically in reversed order  Example: <pre>`{{child_pages(reverse, depth=2) }}`</pre>	

#### History

##### #1 - 2020-05-22 12:44 - F. P.

+1

This is very helpful when storing documentation/protocols in a wiki. Atm one has to scroll down a lot when there are lots of entries. We tried Documents, but there is no changelog.

##### #2 - 2020-05-24 14:25 - Go MAEDA

- Category set to Text formatting

##### #3 - 2021-06-29 11:45 - F. P.

- File reverse.patch added

First: I'm no ruby developer.

I tried to extend the child\_pages macro with the suggested reverse argument.

I would be glad if someone could:

- check if the code is sane
- test this in a development setup

Patch is attached. If I can do something else please point me in the right direction.

##### #4 - 2023-03-23 13:58 - F. P.

- File reverse.patch added

I had the opportunity to ask a colleague that knows ruby to review my patch. The attached updated patch is working fine in our 5.0.3 install. Just in case someone wants to use it.

##### #5 - 2025-02-10 22:59 - F. P.

The changes still work in 6.0.3.

I applied the changes manually, because the macros.rb changed.
