

Redmine - Feature #3122

Subforums

2009-04-05 07:11 - Anonymous

Status:	Closed	Start date:	2009-04-05
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Forums	Estimated time:	0.00 hour
Target version:			
Resolution:	Duplicate		
Description I think it would be good for the forums of subprojects to appear below the forums listing of their parent project, to make things easier to find and more centralized. Maybe others can expand or refine the example image I attached if interested.			
Related issues: Is duplicate of Redmine - Feature #3831: Support for subforums Closed 2009-09-07			

History

I wanted this too, so I created a very **ugly hack** that do the job :)
I used the forum description to see if we need to display the forum as a subforum and/or add spaces to do a separation.

- 1 space at the beginning of the description => subforum
- 2 spaces at the beginning of the description => subforum + separation with the next forum
- 3 spaces at the beginning of the description => separation with the next forum

Modified file is: redmine/app/views/boards/index.rhtml
