

Redmine - Defect #31275

Safari adds .html extension when downloading files of unknown type

2019-04-29 10:46 - Christian Felix

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%

Target version:	4.0.4	Affected version:	4.0.3
Resolution:	Fixed		
Description			
Redmine Version: 4.0.3.stable Browser Version: Safari 12.1 Operating system: macOS 10.14.4			
What is the issue and how can it be reproduced?			
<p>This problem only seems to happen in the Safari browser. When trying to download a "irregular" file such as .indd, .idml, etc. from Redmine, it always adds a .html at the end of the file. Downloading a picture file (.jpeg .png .gif etc.) for example, is working perfectly fine and does not get the .html at the end of the filename.</p> <p>It looks like Redmine adds either the wrong content-type or none at all which may lead to this issue in Safari.</p>			
What is the expected behavior?			
<p>When downloading any type of file from Redmine with Safari, it should always download the file as is and not add anything at the end of the filename.</p>			
Additional info:			
<p>At first I thought that it was an issue with Safari as it was working perfectly fine in Chrome or Firefox but as regular files are working in Safari as well, I kind of think that this is a combined issue of Redmine and Safari. (Safari being too straight with file types)</p>			

Associated revisions

Revision 18098 - 2019-04-30 03:37 - Go MAEDA

Fix that Content-Type header field is empty when sending a file of unknown type (#31275).

Patch by Go MAEDA.

Revision 18099 - 2019-04-30 04:03 - Go MAEDA

Correct the fixture id (#31275).

Revision 18100 - 2019-04-30 04:35 - Go MAEDA

Merged r18098 and r18099 from trunk to 4.0-stable (#31275).

History

#1 - 2019-04-29 15:47 - Go MAEDA

- Category changed from Issues to Attachments

- Status changed from New to Confirmed

Confirmed that the problem is reproducible in the trunk. No problem with 3.4.

Comparing HTTP headers in Redmine 3.4 and the trunk, I found that the header in the trunk has "Content-Type: text/html; charset=utf-8". This may be the cause.

[3.4-stable]
