

Redmine - Defect #3131

Issue Installing/upgrading 0.8.3

2009-04-06 20:04 - Nanda P

Status:	Closed	Start date:	2009-04-06
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Invalid		
Description			
I am trying to Install RedMine 0.8.3 on an PC where trunk version was up & Running.			
1. Took a database backup			
2. Renamed the folder where I have trunk version (current to current0)			
3. Downloaded & extracted 0.8.3 files to C:\Program files\redmine\current\			
4. copied database.yml, environment.rb & email.yml files from previous version to new (config folder)			
When I ran the "rake db:migrate" getting the following error. Any idea?			
C:\Program Files\redmine\current>rake db:migrate RAILS_ENV="production"			
(in C:/Program Files/redmine/current)			
rake aborted!

History

#1 - 2009-04-06 22:18 - Jean-Philippe Lang

- Status changed from New to Closed
- Affected version (unused) deleted (0.8.3)
- Resolution set to Invalid
- Affected version deleted (0.8.3)

Please, do not request support here.
But I would say that your problem comes from the fact that you overwritten the 0.8.3 environment.rb.
