Previous patch uses complicated javascript.
This patch rewrite to use jQuery submit event.

So it cannot check invisible issue.
This patch uses ajax and check in server.

Regarding Maruyama's patches, how about just [#31589](#)? It would be simple and clear.

@Toshi MARUYAMA: It has become very hard to review your patches for this feature. Can you provide all your changes for this feature in a single patch and clearly specify which requirements it has (like a dependency on *an* implementation for issue [#28492](#))?

Done.

- [20200131-series.diff](#) has contains several revisions
- [20200131-collapse.diff](#) collapses [20200131-series.diff](#) revisions to one diff

These depend on [#28492#note-20](#) issue-28492.ver.3.diff.
