Description

Hi everyone,

I just wanted to sync my redmine users or at least the groups with those in my AD/LDAP.
Does someone knows a way to do it?

I found the plugin: https://github.com/thorin/redmine_ldap_sync
but this only supports 3.4x and didn't work on my system, maybe I am doing something wrong or it is just not working cause of the redmine update.

So my question is if there is a way to get it working or an other plugin/workaround?

Best Regards
Kauzig
