Redmine - Feature #31377

Updating project status, or archiving with REST

Description

Hi Redminers,

I've searched and checked google, the forums and documentation, but cannot find any way to close projects while using the REST api.
Our redmine instance is synced with another platform, and is updated using the REST api. But now projects are closing in the other platform and stay open in redmine. This is resolving in quite some clutter at the moment.

I would like to do a patch request with status=0 for example.

Is this a bug, existing but undocumented or a new feature?

Thanks a lot in advance!

(if it's currently not possible, could someone help me creating a patch for this?)

- Jonas
