- Related to Feature #38527: New issues filter operators "has been", "has never been", and "changed from" added

#5 - 2023-05-11 09:34 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed

You can do this by using "changed from" or "has been" operators implemented in [#38527](#).

- `[Status][changed from][value]`: selects issues where the status was the given value at some point in the past
- `[Status][has been][value]`: selects issues where the status was the given value at some point in the past or is currently the given value
