Redmine - Patch #31391

Small refactorization of avatar methods

2019-05-18 13:34 - Marius BĂLTEANU

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Go MAEDA		**% Done:**	0%
Category:	Code cleanup/refactoring		**Estimated time:**	0.00 hour
Target version:	4.1.0			

Description

Small refactorization of avatar methods:

- move existing methods from ApplicationHelper to a new helper file (AvatarsHelper)
- change default avatar size from 50 to 24 because most of the avatars are using the size 24
- class 'gravatar' is always added and all custom classes are appended
- added user name as default title for avatar images
- added two new methods: assignee_avatar and author_avatar

This patch will change 2 existing behaviours:

- in issue#show page, the titles for assignee and author will have the format: Assignee: <user name> and Author: <user name>
- the default title of all avatar is now <user name>

The implementation could be improved more, but it is enough for now.

Any feedback is welcome!

- Target version set to 4.1.0

LGTM. Setting the target version to 4.1.0.

#2 - 2019-05-19 15:10 - Go MAEDA

- Blocks Patch #5899: Display user's gravatar when editing profile added

#3 - 2019-05-20 00:27 - Go MAEDA

- Status changed from New to Closed

- Assignee set to Go MAEDA

Committed the patch. Thanks.

#4 - 2019-05-22 02:57 - Go MAEDA

- Status changed from Closed to Reopened

IssuesController#show raises "undefined method `html_safe' for nil:NilClass" error if the issue is assigned to a group. We can fix the error by applying the following fix.

```

Thanks! Anyway, I'll take again a look over the changes proposed by just to be sure that I didn't break anything else.
