Target version:				
Resolution:	Fixed		**Affected version:**	

Description

Gravatar can't be displayed when copy config/configration.yml.example to config/configration.yml.

Steps to reproduce:

- Copy configration.yml.example to make configration.yml
- Start redmine
- Enable "Use Gravatar user icons" setting
- Display issues/show
- Gravatar is not displayed and ActionController::RoutingError occurs

```
ActionController::RoutingError (No route matches [GET] "/avatar/982b6086063a22d85509455d8e31cca2")
:
```

Cause:
The default for avatar_server_url is 'https://www.gravatar.com' by [configuration.rb#L25](#).
However, the value of avatar_server_url is overwritten with nil because [configuration.yml.example#L225](#) is not commented out.

[#9112](#) is related.
Affected version: trunk.

I think the problem will not occur if you change it as below.

```diff
diff --git a/config/configuration.yml.example b/config/configuration.yml.example
index d11bc61469..d04a239aa4 100644
