Redmine - Defect #3145

Upload of bigger files fails iff version is defined

2009-04-09 12:52 - Carsten Schurig

	Closed	Start date:	2009-04-09
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	0.8.4		
Resolution:	Fixed	Affected version:	
Description		ļ	
Upload of a bigger fil	e (12 MB) fails, iff a version is defined	in the project	
 if a version is defined, a segfault in app/models/attachment.rb happens, no matter if it is assigned to a version or not after deleting all the versions of the project, the upload of a big file is again possible without any problems error.log of apache when the upload fails: /redmine/app/models/attachment.rb:92: [BUG] Segmentation fault

History

#1 - 2009-04-10 18:34 - Jean-Philippe Lang

First, you can have a look at <u>#2933</u>. And <u>r2670</u> fixes a memory consumption problem on file upload. Can you give a try?

#2 - 2009-04-14 09:51 - Carsten Schurig

- Status changed from New to Resolved

Jean-Philippe Lang wrote:

First, you can have a look at <u>#2933</u>.

I've seen it but the problem looked quite different because it worked always without a version defined. Further the error was always the same...

And r2670 fixes a memory consumption problem on file upload. Can you give a try?

r2670 seems to fix it by now as far as I have tested it. I tested it with the file I had originally problems with and additionaly with a 50MB file. It did work with a version defined and without a version defined.

Thanks a lot.

#3 - 2009-04-19 10:53 - Jean-Philippe Lang

- Target version set to 0.8.4
- Resolution set to Fixed

Thanks for your feedback.

#4 - 2009-04-24 18:06 - Jean-Philippe Lang

- Status changed from Resolved to Closed

Merged in 0.8-stable in r2681.
