- File *change\_editing\_document.png* added
- File *31472-add-file-upload.patch* added

This patch adds features similar to [#16410](#) to the documents.  
When editing a document, you can operate (add and bulk delete) the attachments.

- Target version set to *Unplanned backlogs*

Sweet! Thanks for sharing the patch. Scheduled without substantive patch review.

NB: I think it would be nice to introduce this functionality similarly for the remaining attachment containers (news and messages) too.

Thank you for your suggestions. I would be happy if you could create new issues.

When performing bulk delete, the Attachment's after\_commit callback method Attachment#delete\_from\_disk was not executed.  
I fixed a patch.
