

Redmine - Defect #31503

Undefined local variable sender_email in MailHandler#receive_message_reply

2019-06-03 17:45 - Andriy Lesyuk

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Go MAEDA	% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:	3.4.11	Affected version:	3.4.10
Resolution:	Fixed		
Description			
When receiving a reply to a locked topic, mail handler crashes with the following error:			
<pre>undefined local variable or method `sender_email' for #<MailHandler:0x0055675dfa9e10> Did you mean? send_action app/models/mail_handler.rb:289:in `receive_message_reply'</pre>			
That's because receive_message_reply is trying to use sender_email variable, which was not defined in this method. Here is the corresponding line (source:trunk/app/models/mail_handler.rb@18198#L277):			
<pre>logger&.info "MailHandler: ignoring reply from [{sender_email}] to a locked topic"</pre>			

Associated revisions
