Redmine - Feature #31521

Make REST API for users incremental with plugins

Description

At the moment there is no way to add custom values to REST api output for users. This patch adds a helper function to show.api and index.api, which can be overwritten by plugins to add new entries.

E.g. Some plugins like redmine_git_hosting overwrites theses templates, because there is no other way at the moment. Problem is, if two or more plugins wants to add values.

Same solution is already included for projects with render_api_includes.
