Hi,

the Redmine instance on redmine.org is only for developing the project management software Redmine. Redmine is not a SaaS provider as it's found often nowadays.

You can install Redmine on your own hardware or use a 3rd party service like for example [Planio](#) to create your own project.

For further questions please head over to the forums or the chat as this issue tracker isn't meant for support.

Kind regards,

Bernhard
