Redmine - Defect #31724

Wrong spent time calculation via svn commit log

2019-07-15 09:34 - Aleksandar Pavic

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	3.4.6

Description

I have tried both @_h_m or @_h_min same result, as on attached image

History

#1 - 2019-07-29 19:02 - Holger Just

- Description updated

- Status changed from New to Closed

- Resolution set to Invalid

This is expected behavior.

In Redmine, you can configure how Times shoul;d be displayed in **Administration** -> **Settings** -> **Display** -> **Time span format**. By default, Redmine uses decimal (fractional) hours., e.g. 20 minutes are equivalent to a third of an hour, i.e. 0.33h. You can change this to show time spans in a hour-minute format, i.e. as 0:20 h

When adding time via a commit, you can use the both syntaxes equivalently, i.e. you can use either of the following strings in your commit message to add 20 minutes of time, all of which cause the same result:

```
@0h20m
@0:20
@0hours20min
@0.33h
@0.33
```

Internally, Redmine will always store fractional hours.
