Redmine - Defect #3178

Fixing keywords case sensitive

2009-04-15 14:05 - Derek Montgomery

Status:	Closed	**Start date:**	2009-04-15
Priority:	Normal	**Due date:**

Target version:			
Resolution:	No feedback	**Affected version:**	

Description
Seems to me Fixing keywords have case sensitiveness activated... Should be turned off imo, since a word starting a sentence will have a cap, while mid sentence it won't. Both should be able to trigger closing of tickets though.
Thanks.

History

#1 - 2009-04-21 14:25 - Jean-Philippe Lang

Fixing keywords should be case insensitive. See this test: source:/trunk/test/unit/changeset_test.rb@2637#L26
Can you post your exact 'Fixing keywords' setting and the exact commit message please?

#2 - 2009-05-26 10:51 - Dmitry K

- File CaseSensSearch_ru_mismatches.png added

Insensitive search doesn't work with non-English words.
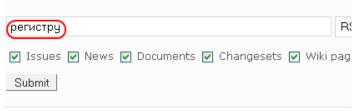

If I type an englilsh word - it's ok:

If russian - it works case sensitive:
Case matches:

Case mismatches:

Your database in UTF8 ?

#4 - 2009-06-14 11:25 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to No feedback

Dmitry, this ticket is not about the search engine but fixing keywords in commit messages.
Derek, reopen if needed.
