

Redmine - Feature #318

Need pagination in my page for assigned issues and reported issues

2007-04-05 05:21 - cao cao

Resolution:			
Description Project manager always assigns hundreds of issues to developers. ;) It's not easy for him to track everyone of them. The issues shown in my page are always the latest 10 updated. Pagination is needed for sure in this case. Thanks -- caocao

I'm currently trying to make "my page" better, I hope
this one will also be included.

As of rev 684, you can view all the assigned/reported issues
(links added on 'My page' blocks).
