Description

Hello,

for example on issues screen, when you apply filters, it generates an url containing:

utf8=✓

Because of this bulk_edit (for instance) is unable to redirect back to this url.
The reason is a function in application_controller.rb - validate_back_url

URI.parse(back_url) is unable to parse the special character mentioned above.

The quickie workaround would be

URI.parse(URI.encode(back_url))

but i am not sure that is sufficient.

It looks good.
I have also suggested the same fix (#31552#note-2).

#2 - 2019-08-01 10:20 - Tibinko H

Oh, ok. Did not see that, I am going to put this issue to resolved then.

#3 - 2019-08-01 10:20 - Tibinko H
- Status changed from New to Resolved

It was committed another solution in that ticket.

Is it not exactly the same as I wrote above?

I think this problem has not been solved yet.

Sorry, my comment(#31831#note-1) may have misled you.
In #31552 issue, #31552#note-3 changes were finally committed, not #31552#note-2 changes.
#31552#note-3 changes were a partial fix and does not solve the bulk_edit problem.

I thought that your suggestion for solving the problem that occurs with bulk_edit is good.

- Target version set to Candidate for next minor release

Tibinko H, thank you for reporting this issue.

Here is a diff of your workaround.

```diff
diff --git a/app/controllers/application_controller.rb b/app/controllers/application_controller.rb
