Target version:		Affected version:	
Resolution:	Fixed		
Description			
New install of Redmine. Log in as an administrator. Go to "administrattion" tab, then select "custom fields". Click on "New custom field". Expected: New custom field form shows. Actual: nothing happens. Cause: the "New custom field" link includes some JavaScript to figure out which tab is selected; it uses this to figure out the "onclick" action. When there are no custom fields, there are no tabs, and therefore the JavaScript fails to generate a valid URL for the onclick. Environment: Redmine version 4.0.4.devel Ruby version 2.3.7-p456 (2018-03-28) [universal.x86_64-darwin18] Rails version 5.2.3 Environment development Database adapter SQLite Mailer queue ActiveJob::QueueAdapters::AsyncAdapter Mailer delivery smtp SCM: Subversion 1.10.3 Git 2.19.0 Filesystem Redmine plugins: no plugin installed

Thank you for sharing this issue.

The changes below should make the "New custom field" link work.

```
diff --git a/app/views/custom_fields/index.html.erb b/app/views/custom_fields/index.html.erb
index 3f1154dc7..0eecc6014 100644
--- a/app/views/custom_fields/index.html.erb
+++ b/app/views/custom_fields/index.html.erb
@@ -1,5 +1,5 @@
<div class="contextual">
-<%= link_to_function l(:label_custom_field_new), "location.href = '#{new_custom_field_path}?tab=' + encodeURI
Component($('.tabs a.selected').attr('id').split('tab-').pop())", :class => 'icon icon-add' %>
+<%= link_to_function l(:label_custom_field_new), "location.href = '#{new_custom_field_path}?tab=' + encodeURI
Component(($($('.tabs a.selected').attr('id')||'').split('tab-').pop()), :class => 'icon icon-add' %>
</div>

<%= title l(:label_custom_field_plural) %>
```
