Redmine - Defect #31957

ActionMailer need to limit how many maximum connections it opens

2019-08-27 10:44 - strhuan blomquist

Status:NewStart date:Priority:NormalDue date:

Assignee: % Done: 0%

Category: Email notifications Estimated time: 0.00 hour

Target version:

Resolution: Affected version: 4.0.2

Description

Microsoft office 365 smtp server has made some changes that will cause this error message

Email delivery error: 432 4.3.2 STOREDRV.ClientSubmit; sender thread limit exceeded basically

New throttling limit for concurrent connections that submit messages

The service has various limits to prevent abuse and to ensure fair use. An additional limit is being added. Under the new limit, up to three concurrent connections are allowed to send email messages at the same time. If an application tries to send more than three messages at the same time by using multiple connections, each connection will receive the following error message:

432 4.3.2 STOREDRV.ClientSubmit; sender thread limit exceeded

https://docs.microsoft.com/en-us/exchange/troubleshoot/send-emails/smtp-submission-improvements

other projects have worked around it by introducing a maxConnections: 3 limitation to there mailers

ex

https://support.sisense.com/hc/en-us/community/posts/360029660673--Custom-SMTP-Email-Server-Solution-for-Outlook365-error-432-4-3-2-STOREDRV-ClientSubmit-sender-thread-limit-exceeded-

my setup

Environment:

Redmine version 4.0.2.stable

Ruby version 2.6.1-p33 (2019-01-30) [x86 64-linux]

Rails version 5.2.2 Environment production Database adapter Mysql2

Mailer queue ActiveJob::QueueAdapters::AsyncAdapter

Mailer delivery smtp

History

#1 - 2019-08-27 11:13 - Go MAEDA

Could you try again after adding the following lines to config/additional_environment.rb?

```
config.active_job.queue_adapter =
ActiveJob::QueueAdapters::AsyncAdapter.new \
  max_threads: 3
```

#2 - 2019-08-27 13:57 - strhuan blomquist

Thanks for the quick response.

so far this seems to have fixed it will keep track during the day.

#3 - 2019-08-28 09:52 - strhuan blomquist

The problem seems fixed so far. So there a way in the future to only make this affect the mailer. I guess this is now a global settings to any class that wants to use the ActiveJob::QueueAdapters::AsyncAdapter.

Hi,

I found the same problem in new install of Redmine with Office 365 SMTP... Does Go MAEDA's solution help?

#5 - 2024-01-09 17:45 - Christian Haeberli

The same issue still occurs with version 5.1.1.

MAEDA's solution still works with this version.

It would be very helpful to mention this config/workaround on the EmailConfiguration Wiki: https://www.redmine.org/projects/redmine/wiki/emailconfiguration

#6 - 2024-12-31 10:33 - Le Thanh Viet

Thanks you! which config file I have to change if I use sidekiq as mailer queue? I'm using Redmine 6.0.2
