Description

Reproduction procedure

- Use MySQL
- Time zone data is not loaded
- Change user language from UTC to something else
- Group by created_on at issues/index

When the above conditions are met, the group_count badge will be displayed as empty as shown in the screenshot.
  ScreenShot-2019-08-29-10.49.27.png

It doesn't matter if group_count is nil because MySQL doesn't get group_count if it doesn't load time zone data.
The problem is that an empty badge is displayed at that time.

Badge should also be hidden if group_count is not successfully acquired(like timelog).

This is a problem with trunk.

History

- File fix-31972.patch added

I forgot to attach the patch.
Change the same as timelog .
