

Redmine - Feature #31984

Permission to add timelogs in past

2019-08-30 13:58 - Aleksandar Pavic

Status: Closed	Start date:

Assignee:	% Done: 0%
Category: Time tracking	Estimated time: 0.00 hour
Target version:	
Resolution: Duplicate	
Description	
<p>There is permission to edit time logs,</p> <p>But, what's missing is <u>forbid to add time log for date in past</u>.</p> <p>There are many use-cases where employees log time on daily basis, but should not be able to log time retro-actively.</p> <p>Even if they don't have edit timelog permission, they can still log time for days in past, which should be good to forbid.</p>

Thanks for checking. We have the same problem In our use case. Users should log their time max 1-3 days back butthey do it just to fiil the time. I'd like to restrict it. If they do not log the time properly, they should have a problem which can solve only someone with higher privilege.
