LGTM. Setting the target version to 4.1.0.

I have updated the patch. It fixes Performance/RedundantMerge RuboCop warning.

#7 - 2019-12-01 08:56 - Mischa The Evil

I understand the rationale behind this change, but I think it is slightly problematic as the group icon is indicative for the differentiation of groups from users on the project members list tab. With the change proposed in this issue it becomes harder to make this distinction, while the added value of showing the gravatar here is pretty low IMHO.

#8 - 2020-01-04 03:57 - Go MAEDA

- Target version changed from 4.2.0 to Candidate for next major release
